Experience

Freelance Graphic Designer

Jun 2014 - Present

Square Bubble Design

Over the past five years I have worked on various projects. These projects have included: building websites from scratch, creating tri-fold brochures, posters, flyers, small advertisements, logo design, wedding invitations, and more! I also had the pleasure of working for New Revelations Collegiate Mission, LP & G Cyber Communications, Pohick Episcopal Church, PHACE Syndrome Community, Colonial Books and Gifts LLC (now closed with owner's retirement), and many more!

While working for New Revelations Collegiate Mission I developed an entire new branding system from scratch. This included: a website, logo, business card, and letterhead.

The work I have done for Pohick Episcopal Church has included several flyers, banners, yard signs, the redrawing of their cemetery map so it would fit on a 8.5x11" sheet of paper, as well as the producing their country fairbook for their 2018 country fair. I am also currently helping them in the production of their new website, which should be released later in 2019.

PHACE Syndrome Community first hired me to help them create a tri-fold brochure which was distributed across the United States and Canada. I was later asked to help with an informational poster for their booth at the annual pediatric dermatology conference in the fall of 2014, as well as a business card.

Other work examples include: a logo for LP & G Cyber Communications, a new website for Colonial Books and Gifts LLC, and two playbooks Gunston Elementary School's spring musicals, along with two T-shirts also for the spring musicals.

Instructor/Graphic Designer

May 2015 - Aug 2016

Digital Kidz, Vienna VA

At Digital Kidz I was responsible for the inventory and management of approximately \$100,000 worth of equipment with zero loss, developed a manager friendly website, and instructed children aged 7-14 in various aspects of graphic design which included: Photoshop, movie making, game design, web design, HTML, CSS, and more.

Graphic Specialist

Sep 2019 - Present

AECOM/Amentum, Arlington VA

Working in a contract role for the DoD, I was responsible for the printing and creation of various office signs and decor. This included the use of printers, lamination, mounting, engraving plates, framing, and cutting custom mattes for the frames.

Education

Liberty University

Class of 2019
